

Kodin Code Session Report - Parneet

Date: 30/9/2026, 11:30:16 pm

QUESTION

Write a java program to traverse an array of integers

AIM

Write a java program to traverse an array of integers

ALGORITHM

Step 1: Start
Step 2: Initialize an array
Step 3: Declare and initialize an integer array with sample elements
Step 4: Traverse the array
Step 5: Use a loop (such as a for loop or enhanced for-each loop) to iterate through each index from 0 to array.length-1
Step 6: Print elements
Step 7: Access and display each element of the array during iteration
Step 8: Stop

SOLUTIONS

File: code.java

```
public class code
{
    public static void main(String args[])
    {
        int numbers[] = {10,20,30,40,50};
        System.out.println("Traversing the array of integers:");
        for (int i = 0; i<numbers.length; i++)
        {
            System.out.println("Element at index " + i + ": " + numbers[i]);
        }
    }
}
```

PROGRAM OUTPUT

```
===== code.java =====
Traversing the array of integers:
Element at index 0: 10
Element at index 1: 20
Element at index 2: 30
Element at index 3: 40
Element at index 4: 50
```

CONCLUSION

Successfully implemented array traversal in Java using a loop to access and display each integer element sequentially from start to end

AI TUTOR INTERACTION REPORT

Attempt 1 — Score: 5 / 5 (100%) — 11:30:03 pm

#	Question	Correct Answer	Your Answer	Result
1	In the for loop, what does numbers.length represent?	The number of elements in the array	The number of elements in the array	Correct
2	Which of the following is the exact for loop header used in the code?	for (int i = 0; i < numbers.length; i++)	for (int i = 0; i < numbers.length; i++)	Correct
3	If the increment expression in line L8 is changed from i++ to i+=2, how many elements will be printed?	3	3	Correct
4	If the expression numbers[i] in line L10 is changed to numbers[i+1], what happens when i equals 4?	Throws ArrayIndexOutOfBoundsException	Throws ArrayIndexOutOfBoundsException	Correct
5	What will be printed if the array numbers is empty (i.e., int numbers[] = {})?	Only the message 'Traversing the array of integers:'	Only the message 'Traversing the array of integers:'	Correct
