

Kodin Code Session Report - Parneet

Date: 1/10/2026, 12:45:27 am

QUESTION

Create a Java program to demonstrate method overriding using an Employee superclass and different types of employees.

Create a superclass Employee with a method calculateSalary() that displays "Calculating employee salary".

Create two subclasses, FullTimeEmployee and PartTimeEmployee, that override the calculateSalary() method.

The FullTimeEmployee class should calculate and display the salary based on a fixed monthly salary.

The PartTimeEmployee class should calculate and display the salary based on hours worked x hourly rate.

In the main() method, use an Employee reference to create objects of both subclasses and call calculateSalary().

Demonstrate how runtime polymorphism allows the appropriate overridden method to execute.

AIM

Create a Java program to demonstrate method overriding using an Employee superclass and different types of employees.

Create a superclass Employee with a method calculateSalary() that displays "Calculating employee salary".

Create two subclasses, FullTimeEmployee and PartTimeEmployee, that override the calculateSalary() method.

The FullTimeEmployee class should calculate and display the salary based on a fixed monthly salary.

The PartTimeEmployee class should calculate and display the salary based on hours worked x hourly rate.

In the main() method, use an Employee reference to create objects of both subclasses and call calculateSalary().

Demonstrate how runtime polymorphism allows the appropriate overridden method to execute.

ALGORITHM

- Step 1: Start
- Step 2: Define Superclass Employee
- Step 3: Define a method calculateSalary() that prints "Calculating employee salary"
- Step 4: Define Subclass FullTimeEmployee
- Step 5: Extend Employee class
- Step 6: Add instance variable monthlySalary
- Step 7: Override calculateSalary() to compute and display fixed monthly salary
- Step 8: Define Subclass PartTimeEmployee
- Step 9: Extend Employee class
- Step 10: Add instance variables hoursWorked and hourlyRate
- Step 11: Override calculateSalary() to compute salary as hoursWorked x hourlyRate and display the output
- Step 12: Execute main method
- Step 13: Declare an Employee reference variable
- Step 14: Assign a new FullTimeEmployee object to the reference and call calculateSalary() to demonstrate dynamic method dispatch
- Step 15: Assign a new PartTimeEmployee object to the reference and call calculateSalary() to demonstrate runtime polymorphism
- Step 16: Stop

SOLUTIONS

File: code.java

```
class Employee
{
    public void calculateSalary()
    {
        System.out.println("Calculating employee salary");
    }
}
class FullTimeEmployee extends Employee
{
    private double monthlySalary;
    public FullTimeEmployee(double monthlySalary)
    {
        this.monthlySalary = monthlySalary;
    }
    @Override
    public void calculateSalary()
    {
        System.out.println("Full-Time Employee Salary (Fixed Monthly):
"+monthlySalary);
    }
}
class PartTimeEmployee extends Employee
{
    private int hoursWorked;
    private double hourlyRate;
    public PartTimeEmployee(int hoursWorked, double hourlyRate)
    {
        this.hoursWorked = hoursWorked;
        this.hourlyRate =hourlyRate;
    }
    @Override
    public void calculateSalary()
    {
        double salary = hoursWorked*hourlyRate;
        System.out.println("Part-Time Employee Salary (" +hoursWorked+" hours at
"+hourlyRate+" per hour): "+salary);
    }
}
public class code
{
    public static void main(String args[])
    {
        Employee emp;
        emp = new FullTimeEmployee(5000.0);
        emp.calculateSalary();
        emp = new PartTimeEmployee(80,25.0);
        emp.calculateSalary();
    }
}
```

PROGRAM OUTPUT

```
===== code.java =====
Full-Time Employee Salary (Fixed Monthly): 5000.0
Part-Time Employee Salary (80 hours at 25.0 per hour): 2000.0
```

CONCLUSION

Successfully demonstrated method overriding and runtime polymorphism in Java using an Employee superclass reference to call the specific calculateSalary() implementations for FullTimeEmployee and PartTimeEmployee objects dynamically at execution time.

#	Question	Correct Answer	Your Answer	Result
1	Which keyword in the Student class prevents direct access to the name field from outside the class?	private	private	Correct
2	Which line of code correctly creates a Student instance with name 'Alice' and roll number 101?	new Student("Alice",101);	new Student("Alice",101);	Correct
3	If line L8 is changed to "this.name = name.toUpperCase();", what will be the output when displaydetails() is called for student1?	Student Name: ALICE, Roll Number: 101	Student Name: ALICE, Roll Number: 101	Correct
4	If line L6 is changed to "public Student (String name, String rollNumber)", what will happen when compiling the program?	Compilation error due to type mismatch	Compilation error due to type mismatch	Correct
5	What exception, if any, will be thrown when the following code is executed? Student student1 = null; student1.displaydetails();	NullPointerException	NullPointerException	Correct

Attempt 2 — Score: 4 / 5 (80%) — 12:16:35 am

#	Question	Correct Answer	Your Answer	Result
1	When the statement `calc.add(10, 20.5)` is executed, which overloaded method is invoked?	add(double a, double b)	add(double a, double b)	Correct
2	Which line in the provided code correctly declares a method that adds two integers?	L4: public int add(int a, int b)	L4: public int add(int a, int b)	Correct
3	If line L6 is changed from `return a+b;` to `return a-b;`, what will happen when the program runs?	The sum of two integers will be printed as a difference.	The sum of two integers will be printed as a difference.	Correct
4	If line L10 is changed from `return a+b;` to `return a*b;`, what will the program output for the decimal addition?	It will compile and print the product of the two decimals.	It will compile and print the product of the two decimals.	Correct
5	What will happen if we add the call `calc.add(10, 20, 30.0);` in the main method?	The program will not compile due to no matching method.	The program will compile but throw a runtime exception.	Wrong

Attempt 3 — Score: 3 / 5 (60%) — 12:43:54 am

#	Question	Correct Answer	Your Answer	Result
1	Which principle allows the Employee reference to invoke the correct calculateSalary() method at runtime?	Polymorphism	Method overriding	Wrong

#	Question	Correct Answer	Your Answer	Result
2	What is the purpose of the @Override annotation in the FullTimeEmployee and PartTimeEmployee classes?	It indicates the method overrides a superclass method	It indicates the method overrides a superclass method	Correct
3	If line L14 is changed to `this.monthlySalary = monthlySalary * 2;`, what will be the printed salary for the fulltime employee?	10000.0	10000.0	Correct
4	If line L16 is removed and the calculateSalary() method in FullTimeEmployee is changed to `public void calculateSalary(int bonus)`, what will happen when `emp.calculateSalary()` is called in main?	Calls Employee's calculateSalary	Runtime exception	Wrong
5	What will be printed if a PartTimeEmployee is created with negative hoursWorked, e.g., `new PartTimeEmployee(-5, 20.0)`?	Salary will be negative	Salary will be negative	Correct

Attempt 4 — Score: 4 / 5 (80%) — 12:45:09 am

#	Question	Correct Answer	Your Answer	Result
1	Which statement correctly describes method overriding in Java?	It allows a subclass to provide a specific implementation of a method already defined in its superclass.	It allows a subclass to provide a specific implementation of a method already defined in its superclass.	Correct
2	What is the purpose of the @Override annotation in the FullTimeEmployee class?	It indicates that the method is intended to override a method in the superclass.	It indicates that the method is intended to override a method in the superclass.	Correct
3	If line L14 (`this.monthlySalary = monthlySalary;`) is changed to `this.monthlySalary = 0;`, what will be the output when `calculateSalary()` is called on a FullTimeEmployee instance with a monthlySalary of 5000.0?	It will print "Full-Time Employee Salary (Fixed Monthly): 0.0"	It will print "Full-Time Employee Salary (Fixed Monthly): 0.0"	Correct
4	If line L12 (`public FullTimeEmployee(double monthlySalary)`) is changed to `public FullTimeEmployee(int monthlySalary)`, what will happen when the code compiles?	The code will fail to compile because the constructor signature no longer matches the call.	The code will compile successfully, and the monthlySalary will be automatically cast to double.	Wrong
5	What will be the output of `calculateSalary()` for a PartTimeEmployee created with `new PartTimeEmployee(0, 25.0)`?	Part-Time Employee Salary (0 hours at 25.0 per hour): 0.0	Part-Time Employee Salary (0 hours at 25.0 per hour): 0.0	Correct
